

Privacy Policy

AppAce Pty Ltd developed and makes available the eButton app. The eButton app requires access to certain information held on your phone, which may include:

Contacts: This information is used to select 'Help Contacts'. The information logged only on your phone is first name and mobile phone number. This allows your 'Help Contacts' to be contacted.

Phone State: This allows the eButton app (Android devices) to check the state of your phone and react appropriately to conditions when you are requesting help.

When you purchase an eButton you provide name, address, email and phone contact information. This enables your eButton to be delivered to you.

None of this information, or any other details or data, is collated or shared with any other entity for any purpose. AppAce Pty Ltd does retain the details provided at the time of purchasing your eButton.

Your privacy is respected.
